

Making pathology  
service delivery  
easier

# PathLite

## Compact

A digital system designed specifically for macro  
imaging within clinical laboratories.

*"The system makes doing my job easier. Not having to write a lot of text for the consultants and being able to find cases and histories quickly saves a lot of time and effort."*

**Christine Swarbrick, Speciality Doctor, Cellular Pathology Department, Craigavon Hospital**

## Save time and improve productivity

It will automate and simplify tasks enabling you to focus on what you do best.

## Enhance accuracy and reduce the risk of errors

The availability of high quality images removes the need for lengthy text descriptions and hand drawings, leaving less room for error.

## Flexible and customisable

This light-weight unit can be placed wherever you want it in the lab and at a range of heights.

## Cost-effective

The PathLite Compact will not only save you money, but save you valuable time too.

## Data is easy to access, share and fully traceable

Cirdan's VividPath software allows images to be accessed wherever and whenever needed. They can be shared easily for teaching, research or second opinion purposes. Full traceability ensures compliance with best practice.

PathLite Compact comes pre-loaded with VividPath software.

### Key Features

- High resolution - 20x optical magnification ensures the picture quality you need.
- LED lighting – built in for consistent image quality even in badly lit laboratories.
- Glare removal – polarisation filters to reduce/remove glare from wet specimens.
- 1-touch calibration – takes under a minute and no need to recalibrate. Ensures reliable measurement at all zoom levels.
- Selection of user friendly control interfaces – touch screen, keyboard, mouse, foot pedal.
- Full range of medical grade accessories, including 17" touch screen PC.
- DICOM Compliant Imaging as standard.
- LIMS/LIS and PACS integration.

### Why choose Cirdan?

- We are a global company with decades of knowledge and experience in imaging and camera technology.
- Consulting, listening and working with laboratory professionals regularly means that we fully understand the lab environment and pathology workflow processes.
- We adhere to and comply with global quality and information security best practice standards and guidelines.
